- VISION STATEMENT

Space Misfits is an innovative sort of MMO that puts gamers in complete control of the game they are playing. By inculcating block chain into online games, Space Misfits gives control to the players and allowing them a chance to earn an income while doing what they love to do, online gaming.

Gamers invest a lot of time trying to get an item that carries great value, but once they have finished the game that item has no value.

The current online games do not provide a platform to the players to earn money while they gaming.

This kind of marketplace is not encouraged which eventually forces the players to try and sell their items to a third party which exposes them to the risk of being banned from the studios or their account is deleted altogether.

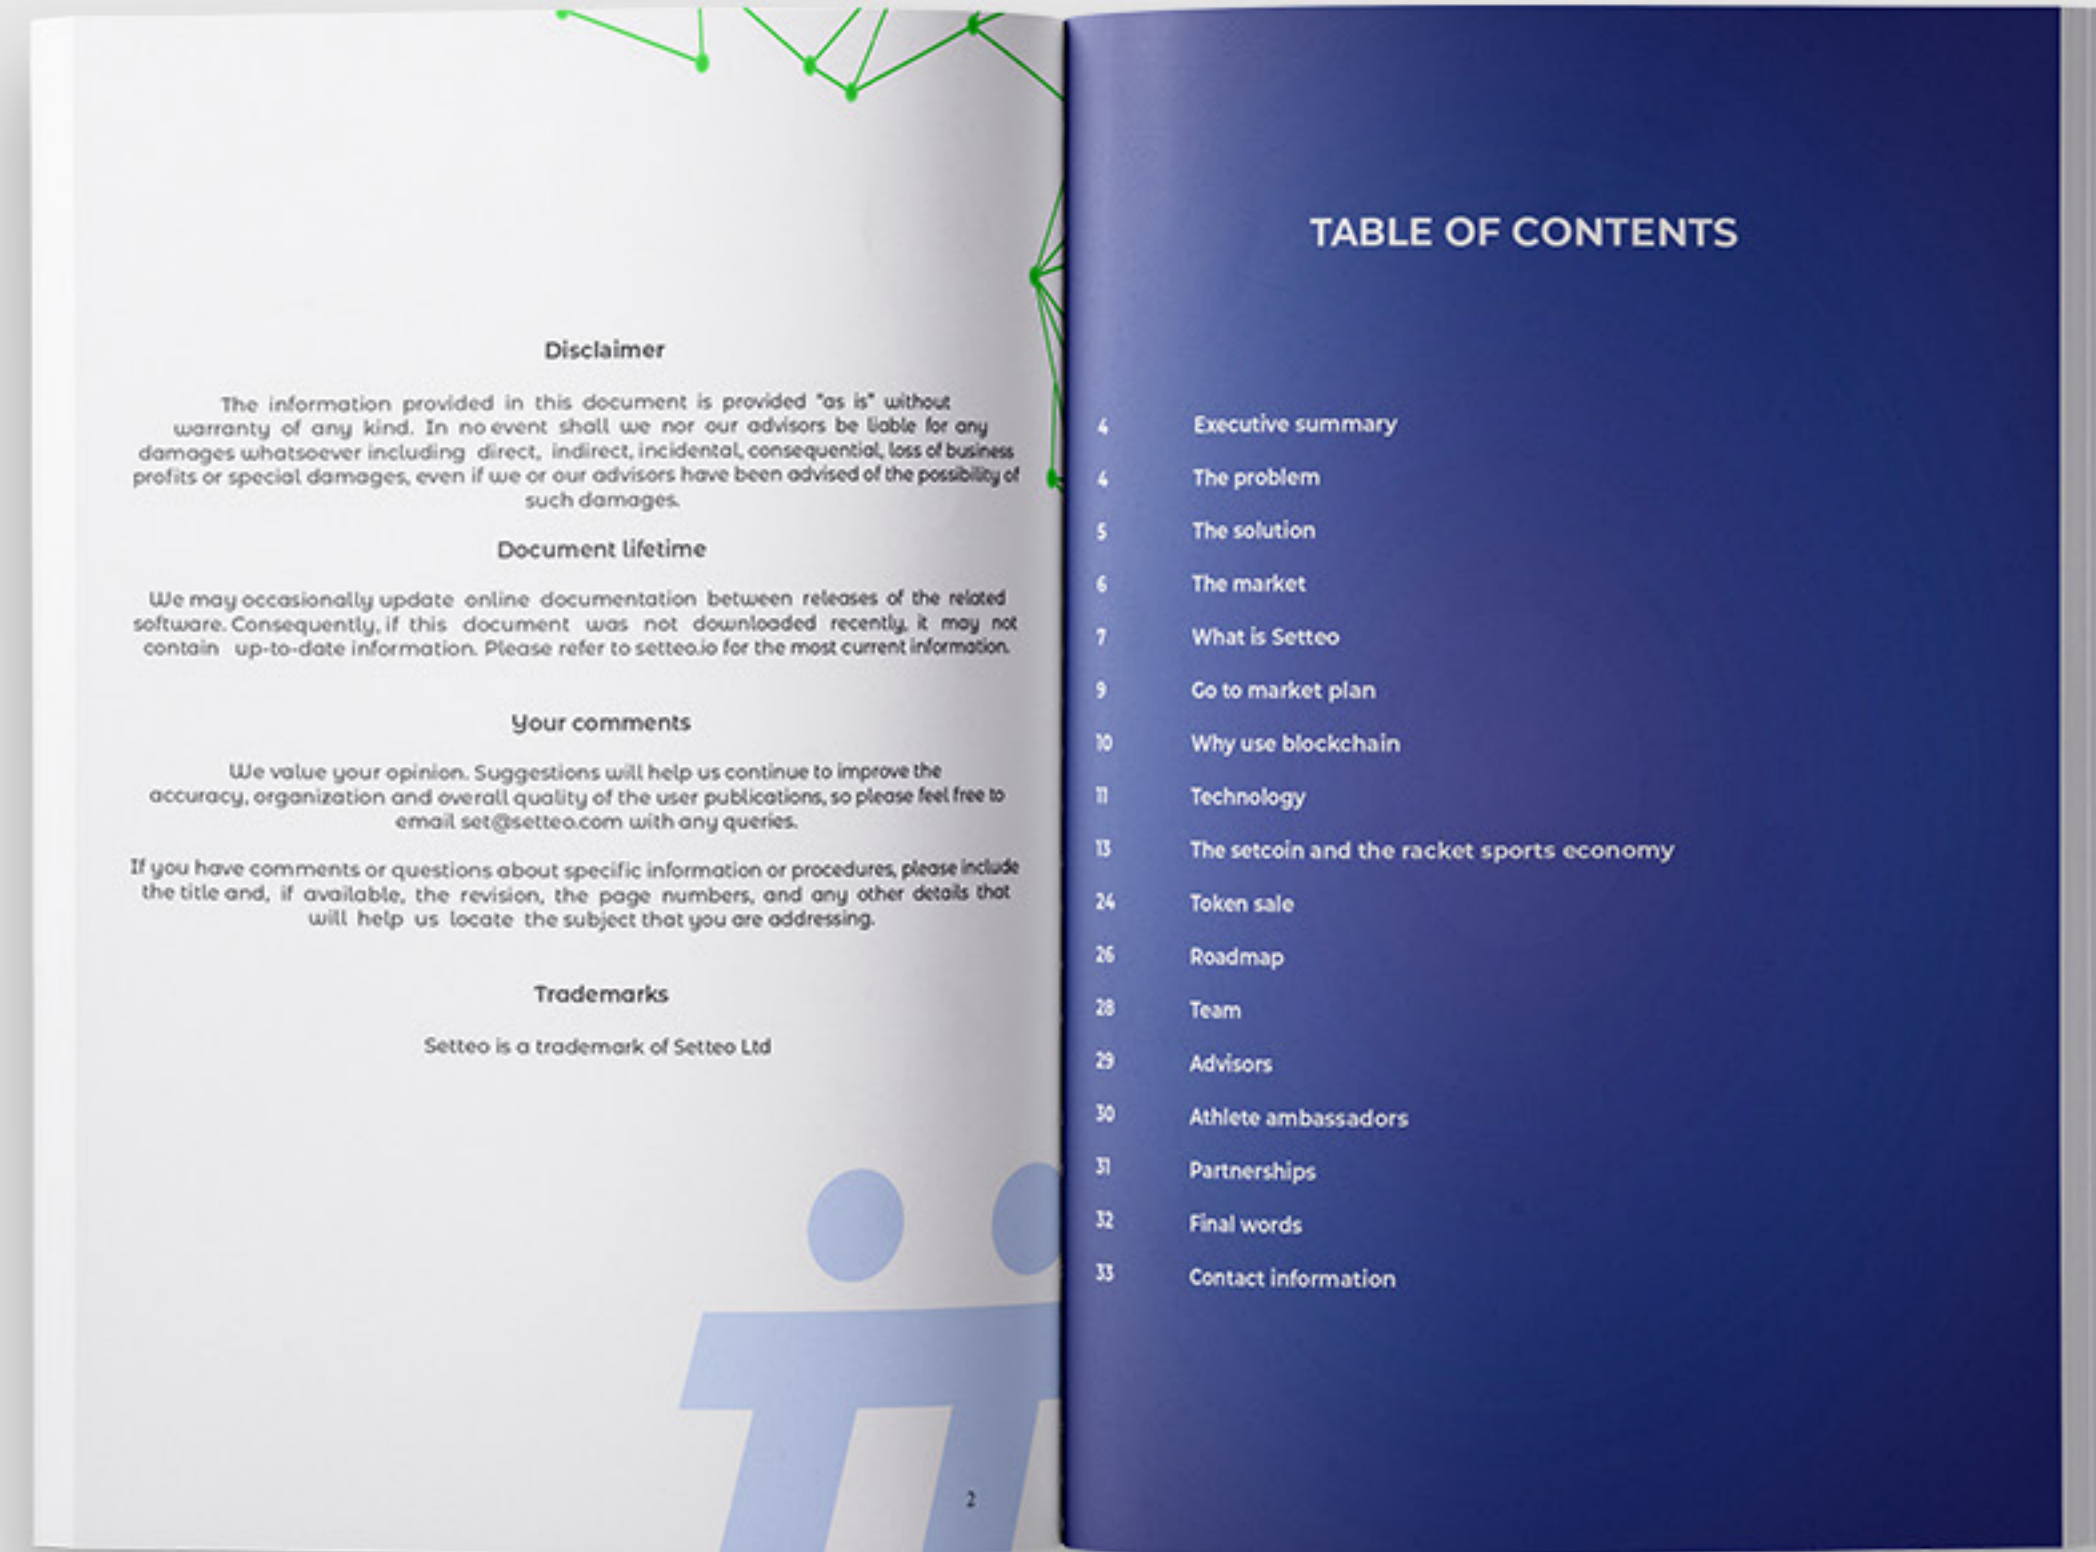

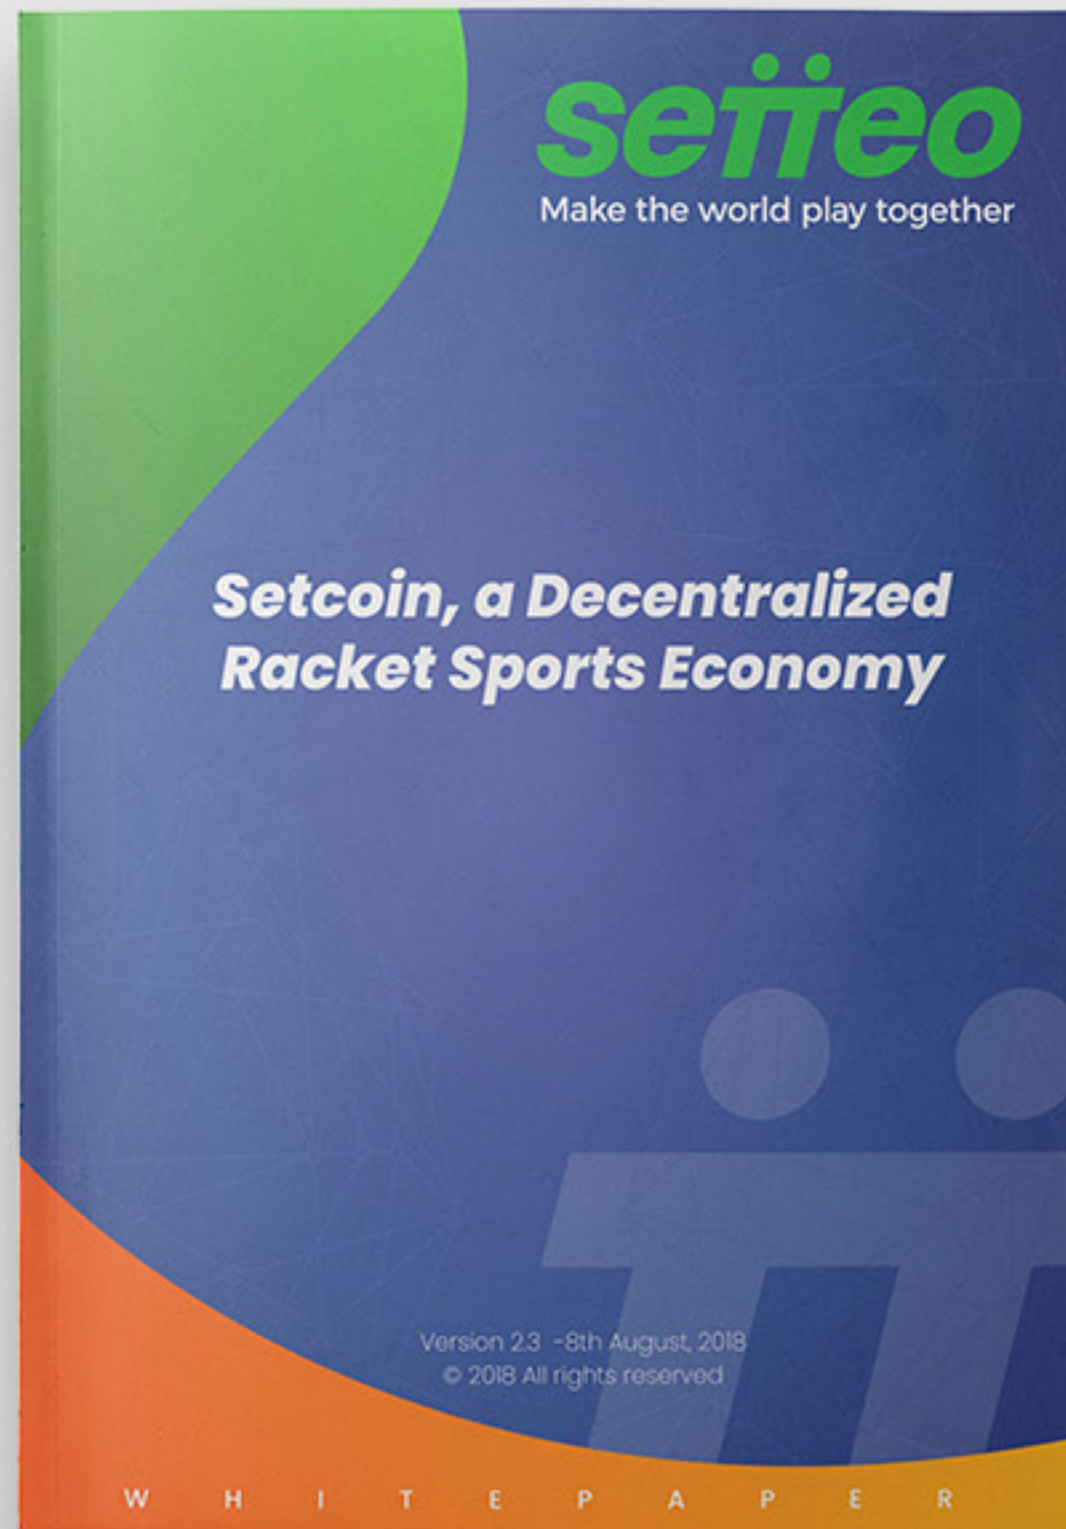

"Billions of Hours a week players spend playing games. It's time they have a way to earn their time and monetary investment back."
Our game is getting immense popularity because:

1. It does not only encourage our players to earn crypto currency but simultaneously gives them a safe and secure marketplace where they can be rewarded for the thousands of hours they spend playing our game.
2. The items they collect have value, and they deserve to sell these items, for they invest so much time trying to obtain these items.
3. We render true ownership of items to our players on the blockchain.
4. As the blockchain is fully transparent, anyone can see what items are being traded and how much those items are selling for.
5. No other digital marketplace in the world can offer such a safe and secure trading place to players.

With this amalgamation of true ownership and a marketplace for players to earn an income, Space Misfits is at the forefront in the Blockchain Gaming Industry.
